Continuation of 11. does NOT place the application in condition for allowance because: the argument provided by the Applicant deemed not persuasive. In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See In re Fine, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988)and In re Jones, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the Applicant argues that the Ooi reference teaches that there is "air behind the prism," at column 15, lines 18-19. The Examiner asserts that the "air behind the prism" describes the Figure 3 and 4 of the Ooi reference. The Ooi reference specifically discloses that Figure 3 and 4, are prior art of U.S. Patent No. 4,726,662, see column 2, lines 44-64, and thus Figures 3 and 4 does not describe any particular embodiments of the Ooi reference. Therefore, anything taught in Figures 3 and 4, is old and well known and Ooi reference is trying to correct the problems associated with the prior art, see column 15, lines 49-50, thus, the Ooi reference teaches away from the air gap behind the air gap.

In arguendo, that the Ooi reference does have air behind the prism, this feature does not teach away from the Abe reference. The Examiner asserts that the claimed features of a light scattering element having an inner angle between 60 degrees and 180 degrees is well known in the art as shown by Ooi reference. Furthermore, the Examiner is combining the features of the prisms of the display device and not the arrangement of the prisms relative to the display device. Thus, the Examiner asserts that the combination of the prior art is valid and maintains the rejection.
